ART F CITY

Selects contains original, commissioned artwork, including museum-quality videos and screensavers, large-scale GIFs, and custom software patches. From Sara Ludy's 449 frame billowing cloud GIF, to Shana Moulton's video documenting the bizarre effects of antidepressants and fibromyalgia medicine, the drive contains work that is extraordinary, beautiful, and just plain weird. It is nothing short of amazing.

Custom ribbons and packaging for the drive have been designed by artist Bunny Rogers, and each drive comes with a certificate of authenticity signed by Art F City's Paddy Johnson and all eleven artists. AFC Selects will be the first portfolio of its kind to take net art offline and put it where the collector can have it — inside a single piece of sapphire.
